

USC2000

Servo Controller For AutomationDirect™ PLC

When you need high precision positioning or tight speed control without a high price, then your answer is the USC2000 Universal Servo Controller from Pyramid Industries. If you know how to program PLC's and don't want to learn a new Servo language, then the USC2000 is the Servo Controller of your choice. All commands and parameters run using AutomationDirect™'s Relay Ladder Logic. You can be up and running in no time!

Features

- ◆ Programming VIA AutomationDirect™ Relay Ladder Logic!!!
- ◆ Index finding on Mechanical Stop or LIMIT SWITCH
- ◆ 64 position "TEACH" mode using internal EEPROM storage
- ◆ Can be configured to be completely STAND ALONE
- ◆ Programmable ERROR detection
- ◆ RLL programming for stand alone applications
- ◆ Low Cost

Typical Applications

- ◆ Industrial Machine Control
- ◆ Materials Handling
- ◆ Servo Control
- ◆ Molding and Casting Machines
- ◆ X-Y Systems
